SOFTWARE ENGINEER .NET DEVELOPER CLOUD (MEDIOR)

ABOUT ENVISTA

Envista (www.envistaco.com) is a world leader in innovative restorative and esthetic dental solutions, providing state-of-the-art evidence-based root-to-tooth solutions, including dental implants, all-ceramic crowns, bridges and laminates, guided surgery planning, scanners and biomaterials.

At Medicim, Envista's global center of Software Development, located in Mechelen, we investigate, develop, maintain and support innovative software solutions for clinicians and dental technicians. Our solutions create intuitive workflows for image acquisition, diagnostics, treatment planning, prosthetic CAD/CAM and dental team collaboration in order to treat patients better. DTX Studio™ is our flagship software suite.

We want to shape the innovation and the industry.

JOB REQUIREMENTS

- Bachelor's or master's degree in Software Engineering, or equivalent through experience.
- A minimum of 5 years of relevant experience in developing high-quality software solutions within an existing larger framework with a clear focus on the maintainability and scalability of new solutions within the existing legacy framework.
- Good knowledge of relevant programming languages and supporting frameworks (e.g., C#, .NET, Angular, HTML, CSS, jQuery, Ajax, WCF).
- Implementation of efficient database operations and queries (MS SQL).
- Experience in Restful web services and API design.
- Experience in Azure functions, server architecture, setup and maintenance.

PERSONAL COMPETENCIES

- You are open-minded, especially regarding code reviews, feedback and guidance from more senior team members.
- You are an open and good communicator.
- You are fluent in English (spoken and written).

WHAT'S IN IT FOR YOU?

- The opportunity to gain experience within an international environment.
- Working in a nice environment in a young and dynamic company.
- An easily accessible office close to Mechelen train station.
